These icons provide important technical information about the garment's construction and performance.

Quick Dry

The open-pored construction guarantees rapid moisture transport. Thanks to its quick-drying properties, the material always feels pleasantly dry. It is also breathable and temperature-regulating.

Soft Touch

Our highly functional materials have been developed to meet the highest demands. Thanks to a special surface structure, a soft touch and a pleasant feel are guaranteed.

Breathable

No matter how hard you play - our highly breathable fabric guarantees excellent moisture transport and thus ensures a comfortable and dry body climate.

High Wearing Comfort

Highly functional textiles and a naturally pleasant feel are not incompatible, so we always take care to create fabrics that ensure maximum comfort next to your skin.

Easy Care

Our textiles have been developed to meet the highest demands, especially those required for sporting activities. This means that they are subject to greater mechanical stress, especially through frequent washing. That is why we have designed our fabrics to be durable and extremely easy to care for.

Dry Comfort

Composed of multiple cross-sectional yarns and high-tech finishing processes. Dry comfort fabric leads sweat away from the body, providing you with a quick-drying and comfortable feeling after exercise.

Recycled materials used in this garment

In addition to the fact that we focus on durability and multi-function when developing our fabrics, there are now effective ways to produce highly functional textiles with fabrics that have less impact on our environment. We are constantly identifying new ways to implement them in our products.
